Mobile modular C QB training systems that turn any space into realistic tr aining arena.

TRANGO SYSTEMS
MODULAR TRAINING INFRASTRUCTURE

2026

www.trango-sys.com

Trango Systems designs and manufactures modular tactical training infrastructure for professional military and law enforcement units. Built for realism, safety, and mobility, its solutions enable fast deployment, flexible reconfiguration, and efficient long-term use across a wide range of training scenarios.

Advanced Material: all products are made of Panel-O-Foam™ - a patented composite manufactured exclusively for Trango Systems. It allows for a light weight, safety, and durability.

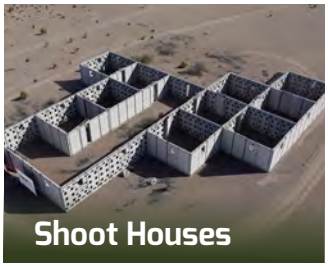
TRANGO SYSTEMS

MODULAR
TRAINING STRUCTURES

Trango Systems' modular training structures are designed to create realistic, reconfigurable environments for tactical training. This includes wall-based and tunnel-based systems that support different layouts, training objectives, and expansion paths.

Modular structures include interconnectable systems:

Wall-based



Shoot Houses

Street Setting

CQB Tracks

Tunnel

Tunnels

Shared Modular Logic

All structures follow the same modular principles: deployable systems, reconfigurable layouts, scalable build-up, and compatible connection logic across training environments.

Modular by Design
Reconfigure layouts with the same core elements.

Built to Scale
Start with one setup and expand over time.

Deployable
Easy for transport, setup, and repeated use.
No ground preparation.
Tool-free assembly.

Mission-Focused
Support different training environments within one structural category.

The following pages show how each modular structure system works and how its configurations are built.

WALL-BASED STRUCTURES

HOW IT WORKS

Trango' mobile modular structures are built around one scalable system. Using the same core building elements, units can create different training environments and expand over time.

Common components

Standard packages

Multiple configur ations

CORE COMPONENTS

The common building blocks used across multiple structures

STANDARD PACKAGES

Core Components are organized into Packages

Package 200	
Wall 200	x4
Window 200	x1
Window Cover	x1
Beam 100	x1
Spider	x1
Stability Package	x1

Door Package	
Wall 200	x4

SWAT STREET TRAINING KITS

Modular street-setting for realistic urban movement, positioning, and scenario-based tactical training.

SWAT Street kits create modular street-style training layouts for open-area tactical drills. They are intended for movement through urban lanes, angle management, use of cover, and team coordination in less confined environments than enclosed structures.

Built on the same wall-based modular logic used across Trango's broader structural systems, these kits can be deployed, reconfigured, and expanded as training needs grow.

Available Configurations

CQB TRACKS

Modular lane-based kits for close-range movement, angle, and engagement drills.

CQB Tracks are modular training kits designed to create lane-based layouts for close-range movement and engagement drills. They support controlled work on angles, exposure, barricade use, and movement through defined modular paths.

Built on the same wall-based modular logic used across Trango's structural systems, CQB Tracks can be deployed, reconfigured, and scaled through three kit levels.

Available Configurations

STRUCTURE COMPONENT KITS

Structure Component Kits provide standard wall-based packages used to build, expand, and adapt Trango's modular structures. **Stability Package** serves as the common connector and support kit across the wall-based system. It is included in the main structure packages and can also be ordered separately as an individual product.

Stability Package

Common connector and support kit used across wall-based layouts.

Included in all Structure Component Kits.

NORAIM

MODULAR TUNNEL SYST EM

HO W IT WORKS

Each tunnel section is built from shared core components.

The Tunnel System is formed by combining four standard section types: Tunnel 200, Tunnel-T, Tunnel-L, and T unnel-X.

The Sections are organized into **Tunnel Kits** that are used to build tunnel layouts of different sizes and comple xity.

Using Trango's common connectors, tunnels can also be integrated with wall-based systems to create broader modular tr aining setups.

BARRICADES

Trango's barricades support positional shooting, angle drills, and varied weapon placements. They can also be integrated into broader modular settings, are included in CQB Tracks configurations, and can connect with other Trango structures through the same compatible s ystem logic.

At 6" (15 cm) thick, these barricades create more realistic shooting conditions. Unlike thin barricades, they require trainees to work with real weapon positioning, offset, and shooting angles.

BARRICADE M ODELS

Available barricade models with shared base format and configur ation-specific cutout patterns.

All models below are supplied with two Barri-Legs and share the same dimensions and w eight.

SHOOTING RANGE
TARGETS & EQUIPM ENT

Trango Systems' targets are engineered from the ground up to provide a superior training experience, focusing on durability, safety, and all-weather performance. The primary benefit of Trango targets is their exceptional resilience. The

targets are engineered to absorb >12,000 rounds of 5.56mm and >6,000 rounds of 9mm hits without breaking do wn.

This extreme durability translates directly into fewer replacements, more consistent training, and significant long-term cost-eectiv eness.

The product r ange includes:

* Note: The LIAM moving target base is recommended for use with dedicated LIAM targets (see next page).

LIAM | **TARGET KITS**

These Target Kits are specifically designed to be used with the moving platform LIAM. They are best balanced and have the ideal sizes. However, the platform may be used with any of T rango's targets.

The 3D Target (see below) is supplied as part of LIAM Target Kits (A and B), and can be transformed into two 2D targets.

Product details are pro vided for a single unit.

	Dimensions	Weight
2D Targets	22.7x51.7" 58x131.3 cm	4.4 lb 2 kg
3D Targets	19.7x19.7x50.4" 50x50x128 cm	8 lb 3.6 kg

VEHICLES
TARGETS & 3D CARS

Trango's vehicle category includes vehicle targets for shooting practice and 3D cars for more realistic situational and tactical training. These products are designed to support vehicle-based drills, cover use, and angle work in urban and field settings.

The product range includes:

Vehicle Targets

Flat vehicle targets for creating more realistic street environments and shooting practice.

3D Functional Models

Full-size functional 3D vehicle models for realistic tactical and situational training in urban or field environments.

Ricochet-Free

Safe training environment. No risk of ricochet or splinter.

Long-Lasting

Strong, able to withstand extreme weather conditions and thousands of live-fire rounds.

Lightweight

Easy to move, transport and reinstall.

Realistic

Full-size vehicle forms for realistic cover, angle, and movement drills.

All vehicle targets are supplied with 2 stands.
Bike targets are supplied with 1 stand each.

VEHICLE T ARGET KITS

Vehicle targets are supplied with stands: standard vehicle targets include 2 stands per target, bike targets are supplied with 1 stand each.

HOUSEHOLD & OUTDOOR **FURNITURE KITS**

Trango's Household & Outdoor Furniture Kits are designed to create more realistic residential and exterior settings for tactical training. Arranged as kits for different household and outdoor scenes, they help units build more varied environments for room-clearing, movement, and scenario-based drills, while still allowing individual items to be moved and reconfigured as needed.

All household and outdoor items are arranged into kits according to standard rooms or house spaces. Each kit is packed in one box with fixed weight and dimentions, for your convenience.
